

WATER TREATMENT

ADDITIVES FOR BOILERS

Forkal Plus: antiscaling for hot water boilers.

Forkal Boiler: non-volatile anti-fouling additive, deoxygenating agent for steam boilers.

Forkal V: volatile neutralizing additive, degasifying for condensation treatment.

Forkal C: complete product consisting of a volatile and non-volatile part for low / medium pressure steam boilers.

ADDITIVES FOR COOLING TOWERS

Forkal Tower: chemical treatment of cooling water in open systems (towers).

Forkal Plus: chemical treatment of cooling water in closed systems (refrigerators).

Biosan Alge Special : bio-dispersant sanitizing.

Biosan Antislime: additive to prevent or remove biofilm formation, broad non-oxidizing action spectrum.

DESCALERS

Descal Acid: descaling liquid, energetic, concentrated and inhibited.

Descal Light: descaling concentrated liquid, also suitable for use on delicate surfaces.

Descalit: descaler concentrate in powder form, excellent on light alloys, also in version with color indicator.

TREATMENT DRAINS

Stark: energetic chemical drain cleaner, acid in liquid form

Starter Zyme: enzymatic liquid solution..

Starter B1: biological activator in powder based on bacteria and enzymes.

Starter Bag: biological activator based on slow release bacteria in bags

GENERAL MAINTENANCE

Seven Plus: release with high penetrating power, both liquid and spray.

Seven Spray: lubricating, releasing, protective, dewatering product.

Grease Cu: anti-seize product for very high temperatures, both loose and spray.

Lubro Cut: oil for threading, various viscosities, both liquid and spray.

Lubro Min: threading oil, can be thinned with water.

Kempro Zinco: cold galvanizing, both liquid and spray.

Kempro Term: aluminum enamels for high temperatures (over 300 ° C), both liquid and spray.

DETERGENTS AND CLEANING SURFACES

DE 75: multi-purpose concentrated detergent.

Dermat 110: non-caustic degreasing detergent.

Format Rapid: non-residual ready to use detergent with high degreasing power.

Kempersolv 60/73: odorless, non-flammable solvents.

Metaldec Cu: pickling agent with brightening action for copper and its alloys.

Kemphos Dec Gel: pickling for cleaning welds on iron.

Metaldec Gel: pickling cleaning agent for stainless steel AISI 300 series.

HANDWASH

Nuvis White: effective pumpable gel with microspheres for heavy dirt.

Nuvis Green: energetic pumpable gel with microspheres for heavy dirt.

Nuvis Pasta Bianca: hand-washing paste with fabric softener.
