

## BIOSAN REP

Repellent, invisible and odorless barrier for insects

### FEATURES

**BIOSAN REP** is a product able to create a protective barrier, invisible and odorless against insects.

**IMPORTANT: THE BIOSAN REP ISN'T AN INSECTICIDE AND THEREFORE IT DOESN'T KILL THE INSECTS BUT THEM ALLOWAN.**

- The product is completely transparent, doesn't alter the appearance of the treated surfaces and remains unaltered over time.
- It doesn't leave greasy or sticky residues.
- No special precautions for the operator are required for use.
- The application can be made with extremely simple equipment, such as a common gardening nebulizer.
- It has a lasting action over time which allows us both to remove the insects present and to prevent subsequent invasions.

### CHEMICAL/PHYSICAL DATA

Aspect:	Liquid
Color:	Colorless
Odor:	Odorless
Density:	0.77+/- 0.05
PH:	NA
Viscosity:	ND
Solub. in water:	NOT soluble
Boiling point:	175-210 °C
Flash point:	60 °C

### APPLICATIONS

The **BIOSAN REP** is especially effective for spiders, ants, cockroaches, beetles, bugs, wasps and small insects in general. The product must be applied in the transit or entrance areas of insects

The **BIOSAN REP** product can be used either for **interiors** (doors and windows, floors, roofs, warehouses, caravans) that for **exteriors** (lampposts, waste bins, hives, garbage dumps).

### HOW TO USE

**BIOSAN REP** must be applied as it is without dilutions.

We recommend using a manual sprayer, such as a simple gardening sprayer. The nebulization by spray allows a yield of 20-40 square meters per liter of product. It is advisable to spray the product on the area involved in the transit of insects, to block their movements, or to spray abundantly around a possible colony to prevent diffusion.
