

BIOSAN WASTE

Sanitizing Deodorizing Detergent

FEATURES

BIOSAN WASTE is a concentrated detergent with an action

Deodorant Sanitizing and detergent.

The product doesn't contain solvents or aggressive components and can therefore be used on any type of surface without problems of unwanted attacks.

It can be manipulated without particular precautions and can therefore be used by operators with extreme simplicity. The **BIOSAN WASTE** formulation provides:

- ✓ Solvents and surfactants with a broad spectrum of action able to perform a high **detergent** action against various types of contamination.
- ✓ A high percentage of quaternary ammonium and glutaraldehyde salts which, at the use concentrations, guarantee a complete **sanitization** of the equipment.
- ✓ It also contains deodorant additives based on essential oils and terpenes which, difficult to remove in the rinse, perform a good **deodorant** action and leave a pleasant fragrance on the treated equipment for a long time.

USE

The **BIOSAN WASTE** is to be used for cleaning and sanitization in the following cases:

- ✓ Waste containers washing plants
- ✓ Waste containers, both urban and industrial
- ✓ Waste bins for recycling
- ✓ Vehicles for waste transport
- ✓ Landfill facilities

HOW TO USE

The product can be used manually with brush-

es, sponges or sprayers, or in automatic washing systems.

The concentrations of use range from 2 to 5% depending on the degree of contamination of the equipment to be treated.

If the product is used on painted parts, with concentrations higher than those suggested, it is recommended to perform compatibility tests
