

D-OX 130

Descaler to remove scales with high concentrations of iron and silica

FEATURES

D-OX 130 is a liquid descaler with high chemical activity.

D-OX 130 is a particular blend of inorganic acids with the power to remove strong contaminations that ordinary descalers aren't ability.

D-OX 130 is ideal to clean exterior railway carriage or to remove concrete from cement mixer trucks.

D-OX 130 have a high concentration of raw materials and a quick action also on high level of contaminations.

In the formula of **D-OX 130** are present surfactants with wetting and penetrating proprieties.

CHEMICAL/PHYSICAL DATA

Physical state	: liquid.
Colour	: colourless.
Water solubility	: total.
Density (20°C)	: 1,10 ± 0,05
pH (sol. 1%)	: < 2

RATE OF USE

Prepare an aqueous solution with 10-50% of product.

Use this solutions in immersion bath, to apply with appropriate spray system or brushes.

Warning: don't use on enamel surfaces, chromium or zinc surfaces. Use with attention on stainless steel, cast iron and cuprum.
