DE 30

Liquid detergent for tough dirt

FEATURES

Cutting-edge liquid formula with high degreasing power for tough dirt. DE 30 quickly removes thick incrustations of oils, greases and any type of sludge, therefore it is suggested for cleaning:

Vehicles, buses, lorries
Boats
Machine tools
Industrial systems

It can also be used to clean and degrease:

Industrial floors
Floors in gres tiles in shopping centres

The product does not contain soda, therefore it can be applied on any type of metal, painted or plastic surface.

It is cost-effective since it can be diluted in water, and removes the waxy layer quickly.

It does not contain acids, aromatic or chlorinated solvents and does not release any toxic substances.

It is over 90% biodegradable and can be regularly disposed of in depuration systems without requiring any particular measure.

CHEMICAL-PHYSICAL DATA

Aspect: Liquid, clear

Colour: Brown

Density: approx. 1.12

pH (1% sol.): 10.0 ± 0.5

Biodegradable: over 90%

METHODS OF USE

DE 30 immediately dissolves in water in all ratios and, at the suggested concentrations of use, it is totally safe on all surfaces. The product can be used without any particular precautions since the composition is free of acids and solvents.

When used in low pressure systems, a 1-5% concentration in water is recommended (1-5 kg of product in 100 litres of water). Lower concentrations can be used in case of high pressure equipment (high-pressure water jet machines), equal to 0.1-1% (100 gr- 1 kg of product in 100 litres of water).

PACKAGING

DE 30 is packaged in plastic containers with sealed cap, in the following capacities: 10-30-60-215-1000 kg

The product is stored in the original containers for at least 3 years.
