DERKEMP B2

Two-component alkaline detergent

FEATURES

It is a two-component alkaline degreaser soluble in water, able to remove oily residues, sludge and any type of dirt with organic component. It is ideal to wash car, lorry, bus bodies, campers, engines, tarps and industrial floors (mechanical workshops, garages, parking lots). In bird farms, it is particularly suitable to remove fowl-manure from the floor when cleaning the areas. The product is suitable for: mechanics, car wash facilities, haulage companies and farms (cattle, pigs, birds and horses).

CHEMICAL-PHYSICAL DATA

Physical state: liquid, biphasic
Colour: straw-yellow
Density (20°C): 1.0780 kg/lt
Solubility in water: 100%
Chlorinated solvents: none
Aromatic solvents: none
pH (1% sol.): approx. 12

METHODS OF USE

Shake the container well in order to mix the two components. Prepare a water solution containing a product concentration between 1.5% and 5% (15-50 gr/lt) according to the type of dirt to remove. Distribute using a suitable nozzle, leave on and rinse using a cold high-pressure water jet machine.

WARNINGS: use caution on aluminium and its alloys.

Wash engines when cold, avoiding extended contacts. At the end of the treatment, rinse thoroughly.
