

FLOOR

Products for floors

FLOOR B

Wash in wax

It is a liquid, non-foaming neutral detergent that puts on the floor a thin layer of non-slip wax, leaving the same shiny and brilliant.

Regular use of **FLOOR B** makes superfluous application of wax and allows, with only one operation, to keep the floors clean and brilliant.

The product can be applied both on floors protected with metallic wax or on unsightly floors such as grids, monocots and grits. It is also particularly suitable for maintenance of bolted rubber flooring.

Add one liter of **FLOOR B** to 20 liters of water, wash the floor with normal cleaning systems, without any special arrangements.

FLOOR MAT

Mechanical floor washer

Specially for automatic machines washer-dryer, it is a highly effective product that can dissolve the strongest dirt.

It can be used indifferently with small machines or self-propelled machines for large surfaces

The **FLOOR MAT** is suitable for all types of flooring, doesn't produce foam, and with one operation it cleans thoroughly leaving a protective film that can repel dirt. Dilute 150 grams of product in 10 liters of water. In case of particularly dirt, it is recommended to increase the concentration. Fill the tank of the

machine with this solution and proceed to the cleaning operation.

FLOOR N

Floor washer

It is a specific product for cleaning thoroughly ceramic floors, stoneware, linoleum and marble, which also, depending on the concentration of use, also performs an energetic remove wax action, leaving a pleasing scent of fresh and clean.

Use **FLOOR N** in aqueous solution at 1-2% and use it as a normal floor washing machine using dusters, sponges or brushes. At the concentrations indicated, the product performs an effective detergent and degreasing action, while operating at higher concentrations (10-20%) and hot water, it will achieve a good remove wax action.

FLOOR DW

Remove wax

Mixture of detergents and solvents to be used to completely remove any wax from the floor. **FLOOR DW** is a particularly energetic product and it is advisable to use it in the case of floors with very old, even multi-layered waxes which have to be completely removed.

FLOOR DW is not diluable with water and should be used pure with tatters or sponges.

It is recommended to accelerate the action by passing on the surface with a brush, manually or with a mechanical brush
