

FORMAT CAR 9

Exterior surface cleaner

CHARACTERISTICS

FORMAT CAR 9 is a lightly acidic cleaner, energetic on dirty, but delicate on surfaces.

It is particularly suitable for the removal of dusty contaminations that standard neutral or alkaline detergents can't remove.

In recommended uses, don't damage paint, aluminum, glass or rubber.

FORMAT CAR 9 is suitable for removal of deposits from smog, dust and deposits resulting from atmospheric precipitation on glass surfaces, plexiglass and paints glossy

The product can be used for external cleaning of:

- **cars**
- **railway vehicles**
- **bus**
- **industrial windows**
- **photovoltaic panels**
- **painted panels**

The product is slightly tixotropic and therefore allows a long contact time avoiding unnecessary waste of product and laborious handling.

CHEMICAL-PHYSICAL DATA

Aspect:	viscous liquid
Colour:	pink
pH:	< 1 (as it is).
Specific weight:	1,100 Kg/l

HOW TO USE

CARS:

Dilute the product 10-30% max in water as needed. Spray the outside of the car, let it operate for a few minutes. Rinse thoroughly.

Do not apply on hot bodies and under direct exposure to sunlight. Avoid solutions dry on surfaces.

RAILWAY VEICHLES:

Dilute the product 30-50% in water as needed. Spray the surfaces, let them act for a few minutes, on the most stubborn dirt possibly brush. Rinse it better with a high-pressure cleaner.

Avoid solutions dry on surfaces.

WINDOWS AND PANELS:

Dilute the product to 10% in water and spray the surface by allowing for a few minutes. Rinse it accurately better with a high-pressure cleaner.

Do not apply on hot surfaces and under direct exposure to sunlight
