

## FORMAT GEL

Multipurpose scented detergent

### FEATURES

It is a low-foaming detergent formulated with different active ingredients able to dissolve and disperse the dirt that is deposited in the refrigeration systems, in the air-conditioning exchangers and in the fan-coils.

Removal: fatty substances, grease, soot, dust and fingerprints without corroding surfaces.

It is also easily rinsed and leaves a pleasant pine scent.

Due to its characteristics it can be used in various sectors such as: kitchens, canteens, nursing homes, institutions, communities, airports, clinics, hospitals and offices.

- ✓ It has an extremely low foam and is easily rinsed without traces or residues remaining.
- ✓ It is neither corrosive nor caustic and therefore it is absolutely safe for all surfaces in aluminum, copper, steel, plastic materials, painted surfaces, etc.
- ✓ It is non-toxic and can therefore be used in kitchens and in environments where foodstuffs are handled.
- ✓ Leave a pleasant scent of pine in the spirals and on the treated surfaces.

### CHEMICAL/PHYSICAL DATA

Physical state	: viscous liquid
Color	: fluorescent yellow
Density <sub>(15°C)</sub>	: 1,08 Kg/lt
Solub. in water	: total
Flammability	: not flammable
pH <sub>(sol. 1%)</sub>	: 10

### HOW TO USE

#### Exchangers for air conditioning

Working with the plant in operation, prepare an aqueous solution of the product at 30-50% (300-500 gr / lt); spray the solution on the lamella of the system, trying to make it penetrate as much as possible even inside. The start-up of the plant will produce condensation that will wash out the debris of the exhausted 'Format Gel' and which will collect it in the appropriate tank.

This 'self-washing' completely eliminates the manual brushing phase.

#### Finned batteries, heaters, filters

Use a 5-10% aqueous solution of product (50-100 g / l) and spray it on the parts to be cleaned. Leave for a few minutes and rinse with clean water.
