

KEMPERSOLV ECO

Vegetable origin solvent

CHARACTERISTICS

KEMPERSOLV ECO is a solvent completely free from the traditional chlorinated and aromatic solvents in compliance with more actual regulations and tendencies about limitation of substances and solvents harmful for the man and environment.

Obtained from natural vegetables renew sources, have a very good solvent and cleaning power towards many substances, like: inks, oils, waxes, etc.

After use remains a agreeable citrus fragrance. KEMPERSOLV ECO is used for degreasing and industrial cleaner surfaces.

CHEMICAL/PHYSICAL DATA

Physical state	: liquid
Colour	: light yellow
Density (15°C)	: 0,77 Kg/lt
Water solubility	: white emulsion
Flammability	: +45°C
DL ₅₀	:10.000 mg/Kg (mouse)

USES

KEMPERSOLV ECO is specifically studied for natural and synthetic leather cleaning. The main application is in the manufacturing industries of sitting room, where product is used for remove trace and residual of pencil, resins, sealant, but also hand print before final shipment, without damage or discolour materials.

Leather so remain cleaned and nourished.

KEMPERSOLV ECO was tested in our laboratories and inside factory of important Italian manufacturing of sitting room and skins.

MODALITY OF USE

KEMPERSOLV ECO can be diluted in water in ratio 1:1 (50% ; 500 gr/lt) however concentration depends on the type of dirt that we want to eliminate. With water is obtained a white emulsion stable for 1 ÷ 2 hours. Stirrer before use in case of emulsion breach.

With stirrer is possible restore original emulsion with unchanged performances.

Apply emulsion on leather surfaces by spray or bathed cloth and polished it.
