

## LAVASTOVIGLIE LIQUIDO

Alkaline liquid detergent for dishwasher

### FEATURES

**Lavastoviglie liquido** for dishwasher is a special formulation for the degreasing of all kinds of crockery and cookware in steel.

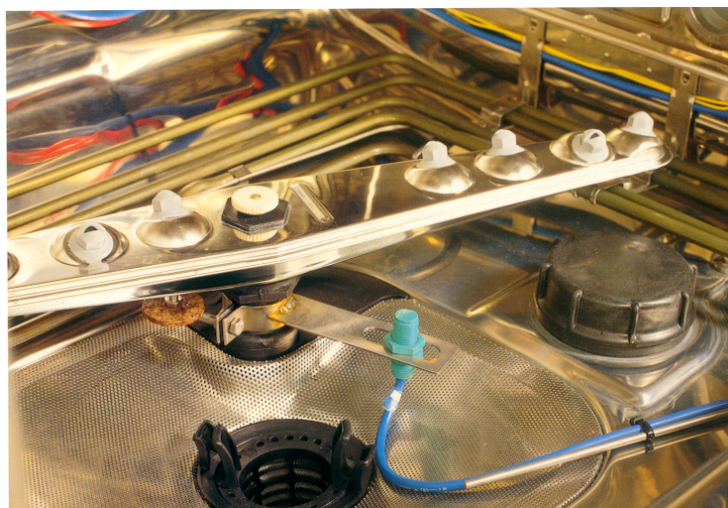

It attacks any kind of dirt and thanks to special additives it prevents the re-deposition.

It doesn't produce foam and does not exert corrosive action against the dishwasher components.

In the presence of hard water it maintains its washing efficiency thanks to the action of the sequestering compounds that block it. The opacification phenomena of dishes, glasses and cutlery are thus inhibited.

It is quickly rinsable and is compatible with subsequent brightener treatments.

**Lavastoviglie liquido** is highly concentrated in active principles and should therefore be used at low dosages.

### HOW TO USE

Add 1 to 3 grams of product per liter of water.

### CHEMICAL-PHYSICAL DATA

-Aspect:	liquid
-Colour:	straw yellow
-Odor:	odoreless
-Density <sub>(20°C)</sub> :	1,1 Kg/lt
-pH <sub>(sol. 1%)</sub> :	12
