

LUBRO MIN D

DISARMANT FOR BUILDING

FEATURES

LUBRO MIN D is an emulsifiable oil for use in aqueous emulsion as a release agent for concrete.

The product, if used at the suggested concentrations, allows a complete detachment of the product from the mold without staining it and leaving no residues.

CHEMICAL/PHYSICAL DATA

Aspect:	liquid
Color:	brown
Density (20°C):	0,95 Kg/l
pH (sol. 1%):	9,2
Flash point:	+180°C

HOW TO USE

The emulsion of the product must be carried out by slowly pouring the oil into the water and stirring the mass.

Apply the product on the formwork, by brush or spray, in the minimum quantity necessary to obtain a perfect detachment of the product.

The dilutions of use must be determined according to the type of processing and are in any case around 4-8%.

The **LUBRO MIN D** can also be used as an anti-adhesive for cement encrustations on the outside of machinery and cement mixers. In this case it should be sprayed on surfaces in concentration equal to 10-20%

PROTECT FROM THE FROST.

KEEP AT TEMPERATURES OVER + 4 ° C.
