

MBL FARM *Odor & Organic Remover*

Liquid probiotic formulation for the neutralization of bad odors and for the digestion and fluidization of sewage in animal husbandry

DESCRIPTION

MBL FARM *Odor & Organic Remover* is a liquid biological activator used in stables and farms of pigs, cattle, poultry, rabbits and horses, for the neutralization of bad smells and for the digestion and fluidification of their sewage.

MBL FARM *Odor & Organic Remover* is used on any type of surface, sewage tanks, manure piles, storage pits, manure spreading systems, sludge, automated systems, conveyor belts, fertigation, courtyards, flooring, etc.

Its liquid form allows a considerable ease of use, especially with automated systems.

MBL FARM *Odor & Organic Remover* is a 100% natural product, which can be used both by inoculation and by spray, composed of probiotic microorganisms, surfactants, nutrients and natural essences, extracted from flowers, fruits, roots and essential oils.

The use of **MBL FARM *Odor & Organic Remover*** contributes to reducing the environmental impact in agro-livestock farms, contributing to the hygiene of the environments, as well as improving the living conditions of the animals and the working conditions of the operators.

ADVANTAGES

- Contains probiotic microorganism, which biologically decompose organic substances and transform them into water and carbon dioxide
- It largely reduces all the reduced forms of sulfur and, consequently, the corrosion in the plants
- It can be used in both aerobic and anaerobic environments
- Drastic reduction of odors and ammonia fumes
- Increases comfort, improves the growth performance of animals, increasing their health and productivity
- Drastic reduction of flies
- It is suitable for organic farming
- It stimulates the colonization of the beneficial bacteria in the barn environment, which help maintain a healthy balance
- 100% natural product, safe for animals, for you and for the environment

INSTRUCTIONS FOR USE

Elimination of bad smells:

Dilute **MBL FARM *Odor & Organic Remover*** from 2% to 4% in water depending on the problem to be solved

Mix Application with manual nebulizers or with automatic nebulization units: finely spray mist in the air over the sources of bad odors

First week, 1 liter of solution for every 2 square meters

Maintenance, 1 liter of solution for every 4 square meters

Slurry treatment in pig and cattle farms:

Dilute **MBL FARM Odor & Organic Remover** 10% in water

Inoculate from 5 to 20 liters of solution for each m³ of liquid sewage

Inoculate 1 to 5 liters of solution for each m³ of semi-liquid or solid sewage

Slurry treatment in poultry, rabbit and horse farms:

Dilute 10% - 15% **MBL FARM Odor & Organic Remover** in water

Spray directly on the belts, immediately before the fertilizer scraper, or spray on the faeces before they fall into the collection tank

Note: prepare only the amount of solution needed for a day, shake the tank well before diluting in water and before applying the ready-to-use solution

PROPERTIES

- **Physical aspect:** liquid
- **Color:** green
- **Odour:** downy
- **Stability:** excellent under normal storage conditions
- **pH range:** 6.5-9.0
- **Solubility in water:** 99.6%
- **Bacterial concentration (C.f.u.*):** 100 million/ml. *colony-forming units
- **Enzyme production:** lipase / protease / amylase / cellulase

PACKAGING

10 and 25 liter plastic cans

STORAGE AND HANDLING

About 12 months, properly stored, in closed containers. Store in a dry place at room temperature and away from light and heat sources.
