

MBL PETS *Stain & Odor Remover*

Probiotic formulation for the neutralization of bad smells and for the removal of stains of an organic nature, released by pets

DESCRIPTION

MBL PETS *Stain & Odor Remover* is a 100% natural product, composed of probiotic microorganisms and natural essences extracted from flowers, fruits, roots and essential oils, which, in synergistic combination, perform the following functions:

Neutralizes and eliminates bad smells generated by urine, manure, vomit, food and drink residues, blood and organic substances in general in bedding, kennels, fabrics, carpets, sofas, mattresses, etc., leaving a delicate and pleasant scent of laundry.

Its mechanism of action consists in encapsulating malodorous substances and breaking them down instantly, eliminating them at the base, unlike conventional deodorants and room fragrances, which only mask the odors in the air.

Dissolves foul-smelling organic substances thanks to its probiotic components, transforming them into water and carbon dioxide. Therefore, it performs a stain remover function for residues of organic substances, such as urine, excrement, vomit, blood, etc., from the surfaces of fabrics, carpets, upholstery, padding, absorbent surfaces in general, which are metabolized and transformed into water and carbon dioxide.

Its use is extremely suitable for the treatment of litter, kennels, box, cages and all areas frequented by our domestic friends.

Particularly appreciated its use on concrete, stone, clay and wooden floors (for outdoors), patios, patio furniture, other outdoor accessories.

A healthier environment for pets is, in turn, a safer and more liveable environment for humans.

ADVANTAGES

- Instantly eliminates bad smells generated by urine, excrement, vomit, food and drink residues, blood, etc. leaving a delicate scent of laundry, pleasant for people and animals
- Its formula, composed of probiotic bacteria and natural essences, dissolves and neutralizes bad smells at the source and puts an end to the markings on the territory
- Formula designed to treat the most stubborn stains produced by pets on fabrics, sofas, carpets, upholstery, sheets, clothing, padding, absorbent surfaces in general
- Contains probiotic microorganisms that biologically decompose organic substances and transform them into water and carbon dioxide
- 100% natural product, safe for you, your pet friend and the environment

INSTRUCTIONS FOR USE

Elimination of bad smells: spray **MBL PETS Stain & Odor Remover** on the affected surfaces.

Stain remover (of organic substances): if possible, absorb the stain with paper, rags or non-woven fabric, spray or pour **MBL PETS Stain & Odor Remover** on the stain by rubbing; leave to act as long as possible, dry with paper or swab.

For resistant stains, after applying **MBL PETS Stain & Odor Remover**, cover the treated area with a damp cloth and leave to act for 6/8 hours, perhaps using the night hours.

PROPERTIES

- **Physical aspect:** liquid
- **Color:** green
- **Odour:** laundry scent
- **Stability:** excellent under normal storage conditions
- **pH range:** 6.5-9.0
- **Solubility in water:** 99.6%
- **Enzyme production:** lipase / protease / amylase / cellulase
- **Bacterial concentration (C.f.u.*):** 100 million/ml. *colony-forming units

PACKAGING

Box with 12 bottles of 1 liter with sprayer

STORAGE AND HANDLING

About 12 months, properly stored, in closed containers. Store in a dry place at room temperature and away from light and heat sources.
