

NUVIS PASTA BIANCA

Handwashing softener paste

CHARACTERISTICS

Detergent and degreaser for very dirty hands.

- It contains a high percentage of emollient substances that protect the hands from reddening and cracking.
- The fern essence contained in the formulation leaves the hands pleasantly scented.
- The product's action on the dirt is due to the presence of particular soaps that can emulsify dirt of any kind without drying or damaging the skin.
- The product dissolves completely in contact with water. Unlike then, traditional pastes containing sand or sawdust do not create clogging problems in sink drains

HOW TO USE

The **NUVIS PASTA BIANCA** product is very active and should always be used in small quantities.

It is recommended to apply it on dry hands, rubbing them to the full emulsion of dirt.

Remove the emulsified dirt and the excess product by rinsing it with clean water
