

## CHARACTERISTICS

**Nuvis San** is an hand soap with sanitising action created on purpose for alimantar sector and for all kind of industrial sectors or communities in which the maintainance of a standard environmental hygiene is required.

The ingredients let to obtain a strong and fast removal of organic dirty (especially animal and vegetal fats and also various proteinaceous exudates) and the throwing down of the total bacterial charge which develops on the cutis of the operators' hands.

It's easy to spread, it produces a little compact foam (therefore the rinse is very fast), it's colorless and without fragrance.

The presence of particular kind of surface-active substances and glycerol, make **Nuvis San** proper for a frequent usage along the working day (such as required by the critical points of the **HACCP** plan), reducing in a significant way the irritations and the sensation of "aridity" of the hands' cutis.

**Nuvis San** is recommended for the personal employed in the working of the meat, of the eggs and by-products, of the creams, of any kind of sauces and in the dairies.

It's excellent for breeders who work and gesture of the milking systems and for the veterinaries.

It can be used also in the "blank rooms" and/or sterile rooms in the pharmaceutical and cosmetic industries.

Physical state	: viscous liquid
Color	: colorless
Odour	: alcolico
Density <sub>(20°C)</sub>	: 1,012 Kg/l
Viscosity <sub>(20°C)</sub>	: 546,7 mPa.s
pH <sub>(1% solution)</sub> :	: 7 ( ) 0,5)

## COMPOSITION

-chloroxidine digluconate:	0,2 %
-isopropyl alcohol:	2,0 %
-glycerol:	1,0 %
-no ionic surface-active agent:	5,0 %
-anionic surface-active agent:	8,4 %

The no ionic surface-active agents satisfy the **FDA 21 CFR 178.3400** of the Food and Drug Administration.
