NUVIS GREEN

Hand soap for tough dirt

FEATURES

NUVIS GREEN is a hand soap in gel with neutral pH, highly effective on greases, oils, paints, inks, glues, and putties. The product is able to remove any type of dirt despite not containing any solvents or aggressive dilutants, but basing its action on a mix of synthetic soaps and a natural solvent, obtained from peels of citrus fruits, which also confer a pleasant smell to the product.

NUVIS GREEN also contains a certain quantity of microgranules in suspension totally of natural origin and ecologically not impacting. They favour the removal and dissolution of paint and dirt, also penetrating within deep skin wrinkles, which would not be possible to reach with the product. These microgranules therefore contribute substantially to the cleaning action of the product without presenting abrasive effects, thanks to their particular comparison.

NUVIS GREEN also contains skin hydrating and softening agents which prevent dryness and chapping, leaving the skin protected.

NUVIS GREEN is the most effective product in all work environments: mechanic workshops, joiner's shops, shipyards, garages, electrical repair shops for cars, scrap yards, fuel transport, maintenance of burners, bodywork, painting, printing works, restorers, shoe factories, etc...

METHODS OF USE

NUVIS GREEN is packaged in five-litre containers with disposable dispenser which supplies 4 grams of product each time it is pressed: this quantity is more than enough to satisfy any requirement. Rub the product on your hands until the dirt is completely dissolved and rinse.

IMPORTANT. NUVIS GREEN is a cosmetic product and the relative folder is filed at Kemper Srl's production plant.
