

PRONEX SLIM

Protective dewatering anti-corrosion

FEATURES

Protective anti-humidity, non-oily, which gives a lasting protection to any type of metal.

On clean and new surfaces, **PRONEX SLIM** removes condensation, penetrates the pores and leaves a transparent, thin and non-sticky film that protects against moisture and corrosive atmospheres. On already corroded metals it penetrates deeply under the rust and leaves a protective barrier that stops any further deterioration.

DETERGENT ACTION

The product exerts a significant detergent action against greases, oils and residues of various processes.

DEWATERING ACTION

The **PRONEX SLIM**, having a very low surface tension, is able to penetrate deeply into the pieces, replacing any traces of humidity. In the case of immersion treatment, the removed water, heavier than the product, quickly separates and collects on the bottom of the tank from where it can be easily removed.

PROTECTING ACTION

The protective film left by the product is continuous, perfectly adherent and very thin, so as not to alter its tolerances and don't require removal. In closed environments it maintains its effectiveness up to a few months. **PRONEX SLIM** is odorless, contains no chlorinated or ozone-depleting solvents and can be handled with complete peace of mind.

It doesn't contain silicones, it doesn't damage plastic and paints and can be used on any type of metal.

Physical state : liquid
 Odor : odorless
 Color : brown
 Density : 0,76 gr/cc
 Flammability : +60°C

USE AND HOW TO USE

PRONEX SLIM should be used as it is and can be applied by immersion, spray or brush.

The product is suitable for processing: molds, slides, tools, sheets, pipes, small parts, motors, scales, valves, springs, ground parts, coin mechanisms, locks, guns and pistols, pumps, winches, fishing reels, chrome plating.
