

PRONEX WAX SPRAY

Protective wax coating

DESCRIPTION

PRONEX WAX SPRAY is a ready-to-use protective agent which dries to form a thin, transparent waxy film in aerosol form.

Provides long term, indoor or outdoor corrosion protection for ferrous and non-ferrous surfaces.

Provides a film barrier which protects against corrosion, even in severe outdoor applications.

The film of **PRONEX WAX SPRAY** resists at many corrosive industrial atmospheres.

Allows colors and marking on protected surface to remain visible.

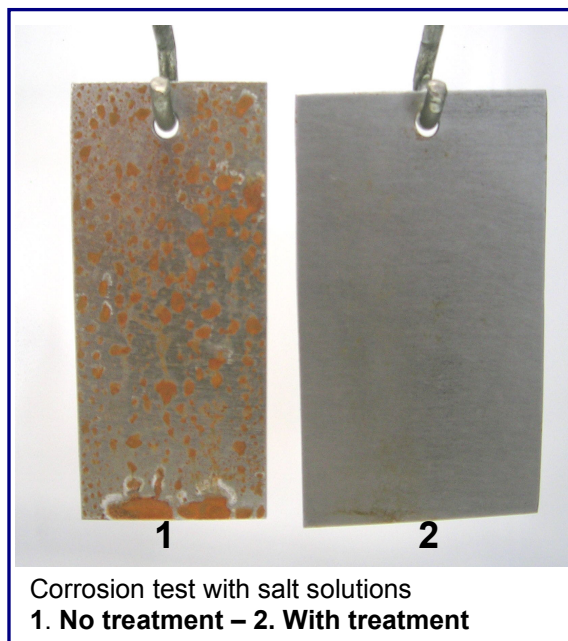

The film of **PRONEX WAX SPRAY** can be easily removed with a safety solvent degreaser when desired.

APPLICATIONS

Use on pipe, chains, pump, wire, cable, structural steel, equipments, parts and tools that stored outdoors or indoors.

Use on exposed metal surfaces, agricultural equipments, construction equipments, industrial machinery, bolts and ball bearings.

Recommended for marine use., ideal for protecting equipment during over-seas shipment.

SPECIFICATIONS

Physical form	: Aerosol
Film color	: white, transparent.
Dry time	: 10'±30'
Thickness of film	: 10 – 30 micron

DIRECTIONS

Don't store under 0°C.

Shake well before and occasionally use.

Clean surface of all dirt, grease and loose rust.

Hold can 30-40 cm from surface.
