

SEVEN FOOD SPRAY

Unblocking for food industry

FEATURES

Unblocking / lubricating product expressly formulated for the maintenance and lubrication of machinery and plants in the following sectors:

- Food industry
- Pharmaceutical industry
- Beverage industry
- Dairy sector
- Meat processing

The low surface tension of the product allows a high penetration in the organs to be lubricated by transporting polytetrafluoroethylene microparticles that guarantee an effective lubricating effect in extreme conditions of load, high speed, washout, temperature and chemical aggression.

- Dissolves and eliminates all those substances that block the surfaces that should be sliding between them.
- Inserts a layer of lubricant between the layers that facilitates sliding and allows disassembly without damage.

CHEMICAL/PHYSICAL DATA

Aspect	: Aerosol (400 ml)
Color	: White veiled
Odor	: odorless
Density	: 0.836 gr/cc
Ignition	: >260 °C
Pression	: 4.5-5.5 bar
Sliding point	: -70°C

The **SEVEN FOOD** doesn't contain solvents and doesn't contain propellants cfc / hfc (DL 549/92), harmful for the ozone layer.

The product is suitable for accidental contact with food according to the following specifications:

- *FDA Section 172.121/2589*
- *FDA Section 121/2586*
- *FDA Section 121/1156-121/1146-121/1166*
- *FDA Section 12150*
- *FDA Section 21/CFR-121/2553-121/1550*

HOW TO USE

Spray the product on the part to be disassembled and let it act for a few minutes so that it can perform its action. The spray package, extremely convenient and economical, is the most suitable to reach the most hidden points, for the most complex equipment.
