

## STREAM IGIENIC SPRAY

Environmental sanitizing deodorizer

### FEATURES

Special formula packed in 400 ml aerosol bottle, specific for deodorizing and environmental sanitization and for the sanitizing treatment of air treatment units.

The product allows to obtain three synergistic effects simultaneously:

- ✓ **Deodorization.** Thanks to the sanitizing action, it neutralizes the source of unpleasant odors on surfaces.
- ✓ **Fragrance.** The high persistence allows, for a long time, a pleasant fragrance in the environment.
- ✓ **Sanitation.** It is particularly indicated for the treatment of decontamination of the humidification grids of air conditioners and fan-coils.

The sanitizing substances contained are innovative, without any danger symbols at the dose of use and therefore particularly suitable for use in working environments, offices, communities, homes, etc.

The product is ideal for: hotels, restaurants, offices, meeting rooms, toilets, saunas, gyms, hospices, clinics, funeral parlors and mobile homes (campers, buses, trucks, train carriages, etc.).

**STREAM IGIENIC SPRAY** is also particularly suitable for cleaning and sanitizing split and fan-coils and is fully compatible with surfaces in copper, aluminum, steel and plastics.

### CHEMICAL/PHYSICAL DATA

Physical state : aerosol  
 Color : colorless  
 Odor : musk  
 Density :  $0.8 \pm 0.05$   
 pH : N.A.  
 Propellant : Propane-Butane

### HOW TO USE

**Conditioning systems:** clean the surfaces to be treated and spray the product directly on the lamellar packs, on the condensation drainage channels and on the filters. Wait at least five minutes before starting the system. The sanitizing agent with a residual action will thus confer a bacteriostatic effect on the unit without being released into the environment. The air will instead be pleasantly perfumed.

**Environment:** To purify an environment, aim the jet of the cylinder upwards, going from the bottom of a room to its exit. Don't spray the product directly on walls or fabrics of various kinds.

**Surfaces:** after a preventive cleaning, spray the product directly on the surface until it is completely damp.

### PACKAGING

**STREAM IGIENIC SPRAY** is available with musk scent and is packaged in 400 ml aerosol can.
